

40-Channel 2.4 GHz Caller ID with **Call Waiting Cordless Telephone** User's Guide

INTRODUCTION

Your Caller ID phone stores and displays specific information, provided by your local telephone company, to subscribers of Caller ID or similar caller identification services. You must subscribe to one of these services in order to use this unit

Your Caller ID phone enables you to:

- Know who called while you were away.

To get the most from your new phone, we suggest that you take a few minutes right now to read through this user's auide.

subscribe to either the standard Name/Number Caller ID Service or Caller ID with Call Waiting Service. To know who is calling while you are on the phone, you must subscribe to Caller ID with Call Waiting Service.

electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home goes out.

CAUTION: When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY INSTRUCTIONS provided with this product and save them for future reference.

FCC REGISTRATION INFORMATION

- Your telephone equipment is registered with the Federal Communications Commission and is in compliance with parts 15 and 68, FCC Rules and Regulations. Notification to the Local Telephone Company
- On the bottom of this equipment is a label indicating, among other information, the FCC Registration number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company.

The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

 This equipment may not be used on coin service provided by the telephone company. • Party lines are subject to state tariffs, and therefore, you may not

- be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
 Notice must be given to the telephone company upon
- rmanent disconnection of your telephone from your line.
- Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations. The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.

HEARING AID COMPATIBILITY

This telephone system meets FCC standards for Hearing Aid Compatibility

BEFORE YOU BEGIN

PARTS CHECKLIST

Make sure your package includes the items shown here. Ŵ Belt clip Mounting bracket M Handset Telephone AC power Handset battery line cord supply **MODULAR JACK REQUIREMENTS**

You need an RJ11 type modular phone jack, which is the most common type of phone jack and might look like the one pictured here. If you don't have a modular jack, call your local phone company to find out how to get one installed.

INSTALLATION NOTE: Some cordless telephones operate at frequencies that may cause interference to nearby TVs microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave ovens, or VCR. If such interference continues, move the cordless telephone farther away from these appliances.

Certain other communications devices may also use the 2.4 GHz frequency for communication, and, if properly set, these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the owner's manual for these devices on how to properly set channels to avoid interference. Typical devices that may use the 2.4 GHz frequency for communication include wireless audio/ video senders, wireless computer networks, multihandset cordless telephone systems, and some longrange cordless telephone systems.

DIGITAL SECURITY SYSTEM

Your cordless phone uses a digital security system to provide protection against false ringing, unauthorized access, and charges to your phone line.

When you place the handset in the base, the unit verifies its security code. After a power outage or battery replacement, you should place the handset in the base for about 20 seconds to reset the code.

INSTALLATION

DESKTOP INSTALLATION

NOTE : For desktop charging only, the handset is able to charge facing up or down.

- 1. Remove the battery compartment door on the handset. insert the battery pack, plug the cord into the jack (inside the compartment), and replace the compartment door.
- 2. Set the RINGER switch (on the handset) to ON and place the handset in the cradle on the base
- 3. Plug the telephone line cord into the TEL LINE jack on the back of the base and into a modular jack.
- 4. Plug the power supply into the power jack on the back of the base and the other end into an electrical outlet. The "charge" indicator comes, verifying the battery is charging.

Allow the phone to charge for 12 hours prior to first use. If you don't properly charge the phone, battery performance will be compromised.

NOTE : The phone is shipped in Tone Dialing Mode from the manufacturer.

WALL MOUNT INSTALLATION

Because it is necessary to charge the handset for 12 hours prior to connecting the phone for use the first time, it is better to leave the unit on a flat surface during initial charge before attempting to hang it on the wall

- 1. Remove the battery compartment door on the handset, insert the battery pack, plug the cord into the jack (inside the compartment), and replace the compartment door.
- 2. Set the RINGER switch (on the handset) to ON and place the handset in the cradle on the base.
- 3. Plug the power supply into the power jack on the back of the base and the other end into an electrical outlet. The "charge" indicator comes, verifying the battery is charging.

Allow the phone to charge for 12 hours prior to first use. If you don't properly charge the phone, battery performance will be compromised.

- 4. Remove the handset from the cradle and set aside. Turn the base over and align the four slots on the bottom of the base with the four hook-tabs on the mounting bracket
- 5. Insert the hook-tabs into the slots and push upwards until the mounting bracket snaps securely into place.
- 6. Plug the telephone line cord into the TEL LINE jack on the back of the base and the other end into a modular iack.
- 7. Slip the mounting holes on the bracket over the wall plate posts and firmly slide the unit down into place (wall plate not included).

8. Place the handset in the cradle.

NOTE: If desired, gather the extra telephone line and power supply cord together, fasten with a wire tie. and store inside the wall mounting bracket.

NOTE : The phone is shipped in Tone Dialing Mode from the manufacturer.

CAUTION: Use only the ATLINKS USA, Inc. 5-2501 power supply that came with this unit. Using other power supplies may damage the unit.

SET UP

There are five programmable menus available: Language, Area Code, Ringer Tone, Set Tone/Pulse, and Default Setting.

LANGUAGE SETTING SELECTION

- 1. Press the flash/program button until "1ENGLISH 2FRA 3ESP " shows in the display. " 1ENGLISH " is the default settina.
- 2. Use the CID review (up or down arrow) button or the handset number pad to enter your selection
- 3. Press flash/program to store selection. You will hear a confirmation tone.

AREA CODE SELECTION

- 1. Press the flash/program button until "SET AREA CODE - " shows in the display. "- - - " is the default setting.
- 2. Use the handset number pad to enter your three digit area code
- 3. Press flash/program to store selection. You will hear a confirmation tone.

Ringer Tone Selection

- 1. Press the flash/program button until "SET RINGER TONE123" shows in the display. "1" is the default setting.
- 2. Use the CID review (up or down arrow) button or the handset number pad to scroll to 1, 2, or 3.
- 3. Press flash/program to store selection. You will hear a confirmation tone.

TONE/PULSE DIALING SELECTION

- 1. Press the flash/program button until "SET TONE/PULSE 1TONE 2PULSE" shows in the display. "1TONE" is the default setting.
- 2. Use the CID review (up or down arrow) button or the handset number pad to scroll to 1TONE or 2PULSE.
- 3. Press flash/program to store selection. You will hear a confirmation tone.

DEFAULT SETTING SELECTION

- 1. Press the flash/program button until DEFAULT SETTING? 1YES 2NO shows in the display. "2NO" is the default settina.
- 2. Use the CID Review (up or down arrow) button or the handset number pad to scroll to 1YES or 2NO.
- 3. Press flash/program to store selection. You will hear a confirmation tone.

CORDLESS PHONE BASICS

RECEIVING A CALL

1. Check the display to see who is calling.

2. Press the TALK button.

MAKING A CALL

To make a call, press the TALK button before you dial and press it again to hang up.

REDIAL

While the phone is on, press the redial/delete button to redial the last number you dialed (up to 32 digits). If you get a busy signal, and want to keep dialing the number, just press redial/delete again (you don't have to turn the phone off and back on).

FLASH

Use the flash/program button to activate custom calling services such as call waiting or call transfer, which are available through your local phone company.

TIP: Don't use the TALK button to activate custom calling services such as call waiting, or you'll hang up the phone.

IN USE INDICATOR

The phone is ON when the indicator on the handset antenna is lit and the page/ in use indicator on the base is lit. The antenna indicator and the in use indicator on the base flashes when you receive a call.

CHANNEL BUTTON

While talking, you might need to manually change the channel in order to get rid of static. Press and release the chan button to advance to the next clear channel.

TEMPORARY TONE

This feature enables pulse (rotary) service phone users to access touch-tone services offered by banks, credit card companies, etc., by pressing the TONE button to temporarily make the phone touch-tone compatible. To get information about your bank account, for example, you would:

- 1. Call the bank's information line.
- 2. Press the TONE button (*) after your call is answered.
- 3. Follow the voice instructions to complete your transaction
- 4 Hang up when finished The phone returns to Pulse (rotary) service

HOLD

Press the hold button to put a call on hold. HOLD shows in the display, and the handset antenna indicator flashes. To release a line on hold, press the hold button again or pick up an extension phone.

CANCEL

Press the cancel button to cancel any command you initiated. Press cancel to hang up after finishing a call.

FINDING THE HANDSET

This feature helps to locate a misplaced handset

Press the PAGE button on the base. The handset beeps continuously for about 2 minutes or until you press the TALK button on the handset.

NOTE: The ringer does not have to be on for this feature to work.

Ringer Switch

The RINGER switch must be **ON** for the handset to ring during incoming calls.

VOLUME

The VOLUME button controls the volume of the handset's earpiece.

VOICE MESSAGING

Provided your phone company offers voice messaging service and you subscribe to it, the in use/vmwi indicator on the base flashes when the phone is not in use to indicate there is a message waiting. It stops flashing after the message has been reviewed.

CALLER ID FEATURES

This unit receives and displays information transmitted by your local phone company. This information can include the phone number, date, and time; or the name, phone number, date, and time. The unit can store up to 40 calls for later review.

Caller ID phone number Caller ID name

CALLER ID WITH CALL WAITING

Provided you subscribe to Caller ID with Call Waiting service from your phone company, you are able to see who is calling when you hear the call waiting been. The caller identification information appears in the display after you hear the tone.

• Press the flash button to put the current person on hold so that you can answer the incoming call.

IMPORTANT: In order to use the Caller ID functions with this unit, you must subscribe to either the standard Name/Number Caller ID Service or Caller ID with Call Waiting Service. To know who is calling while you are on the phone, you must subscribe to Caller ID with Call Waiting Service.

RECEIVING AND STORING CALLS

When you receive a call, the information is transmitted by the phone company to your Caller ID telephone between the first and second ring.

When the memory is full, a new call automatically replaces the oldest call in memory. NEW appears in the display for calls received that have not been reviewed.

NOTE: Check with your local phone company regarding name service availability

REVIEWING RECORDS

As calls are received and stored, the display is updated to let you know how many calls have been received.

- Press the CID review down button to scroll through the call records from the most recent to the oldest.
- Press the CID review up button to scroll through the call records from the oldest to the newest

TRANSFERRING CID RECORDS TO MEMORY

You may transfer a Caller ID record to your phone's memory

NOTE: It is important that you format CID records correctly before storing in memory. It is not possible to re-format CID records stored in memory.

- 1. Use the CID review (up or down arrow) button to scrol to the desired record.
- 2 Press the mem button

in use/vmv

indicator

charge/pag

PAGE

3. Press the desired memory location. Example, press the number 1 key to store the record in memory location 1. You will hear a confirmation tone.

DELETING RECORDS

Use the redial/delete button to erase the record currently shown in the display or all records.

DELETING THE CURRENT RECORD

- 1. Make sure the phone is **OFF** (not in talk mode).
- 2. Use the CID review (up or down arrow) buttons to display the desired Caller ID record.
- 3. Press redial/delete. The display shows DELETE CALL ID?
- 4. Press redial/delete again to erase the record and the next Caller ID record shows in the display. You will hear a confirmation tone.

DELETING ALL RECORDS

- 1. Make sure the phone is **OFF** (not in talk mode).
- 2. Use the CID review (up or down arrow) buttons to display any Caller ID record.
- 3. Press and hold redial/delete button until DELETE ALL? shows in the display.
- 4. Press redial/delete again to erase all records. You will hear a confirmation tone. The display shows NO CALLS.

DIALING A CALLER ID NUMBER

- 1 Make sure the phone is **OFF** (not in talk mode)
- 2 Use the CID review (up or down arrow) buttons to display the desired Caller ID record.
- 3. Press TALK/callback. The number dials automatically.

CHANGING THE NUMBER FORMAT

The FORMAT button lets you change the format of the displayed number. The available formats are as follows. _

7-digit	7-digit telephone number.
10-digit	3-digit area code + 7-digit telephone number.

- long distance code "1" + 3-digit area code + 11-digit 7-digit telephone number
- 1. Use the CID review (up or down arrow) buttons to scroll to the number you want to call back.
- 2. If the number will not dial as shown, press the FORMAT button. Repeat if necessary, until the correct number of digits are shown.
- 3. Press TALK/callback. The number dials automatically.

MUTE

Use the mute button during a phone conversation to speak privately with another person in the room. The person on the telephone will not hear your private conversation.

MEMORY

Store up to ten 24-digit numbers in memory for quick dialing. This memory feature is in addition to the 40 Caller ID records that can be stored in the Caller ID memory log.

STORING A NAME AND NUMBER IN MEMORY

- 1. Make sure the phone is **OFF** (not in talk mode).
- 2. Press the mem button.
- 3. Press the desired memory location (0 through 9).
- 4. Press the mem button again. The display shows ENTER NAME.

NOTE: If you don't want to enter the name, skip step 5.

5. Use the number keys on the handset to enter the name (up to 15 characters) and press the memory button to save. More than one letter is stored in each of the number keys. For example, to enter the name Bill Smith, press the 2 key twice for the letter B. Press the 4 key 3 times for the letter I. Press the 5 key 3 times for the letter L. Press the 5 key 3 times for the second letter L, and wait 1 second for the cursor to automatically move to the next position. Press the 1 key to insert a space between the L and the S. Press the 7 key 4 times for the letter S: press the 6 key once for the letter M: press the 4 key 3 times for the letter I: press the 8 key for the letterT; press the 4 key twice for the letter H

NOTE: The cursor will automatically move to the next position if another number key is pressed.

- 6. Press the mem button to save the name. The display shows ENTER NUMBER
- 7. Use the number keypad to enter the telephone number you want to store (up to 24 digits).
- 8. Press mem again to store the number.

CHANGING A STORED NUMBER

Use the same procedure to change a stored number as you do to store a number-you're just replacing the phone number with a different one.

STORING A REDIAL NUMBER

- 1. Make sure the phone is **OFF** (not in talk mode).
- 2 Press the mem button
- 3. Press any number key (0-9) to store the phone number in that memory location.
- 4. Press redial.
- 5. Press the mem button again to confirm.

DIALING A STORED NUMBER

- 1. Make sure the phone is **ON** by pressing the TALK/ callback button
- 2. Press mem
- 3. Press the number (0-9) for the desired memory location. The number dials automatically.
- OR 1. Make sure the phone is OFF (not in talk mode).
- 2. Press mem.
- 3. Use the CID review (up or down arrow) buttons to scroll through the numbers stored in memory until the desired number is shown

4. Press TALK/callback. The numbers dial automatically.

IMPORTANT: If you make test calls to emergency numbers stored in memory, remain on the line and briefly explain the reason for the call to the dispatcher. Also, it's a good idea to make these calls in off-peak hours, such as early morning or late evening.

INSERTING A PAUSE IN THE DIALING SEOUENCE

Press the # PAUSE button two times to insert a delay in the dialing sequence of a stored telephone number when a pause is needed to wait for a dial tone (for example after you dial 9 for an outside line, or to wait for a computer access tone). PAUSE shows on the display as a "P." Each pause counts as 1 digit in the dialing sequence.

REVIEWING AND DELETING STORED

NUMBERS

- 1. Press mem, then use the CID review (up or down arrow) buttons to view the entry.
- 2. While the entry is displayed, press redial/delete to delete the entry. The display shows DELETE?
- 3. Press redial/delete a second time to delete the entry. The display shows DELETED.

CHAIN DIALING FROM MEMORY

Use this feature to make calls which require a sequence of numbers such as using a calling card for a frequently called long distance number. Basically, you dial each part of the sequence from memory. The following example shows how you can use chain dialing to make a call through a long distance service:

The Number For	Memory Locati	on
Long distance access numbe	r	7
Authorization code		8
Frequently called long distan	ce number	9

- 2. Press mem and then press 7.
- 3. When you hear the access tone, press mem and then press 8.
- 4. At the next access tone, press mem and then 9.
- TIP: Wait for the access tones before pressing the next memory button, or your call might not go through.

 \cap -

CONNECTING THE BELT CLIP

There are two slots, one on each side of the handset.

· Attach the belt clip by inserting the sides of the belt clip into the slots. Snap the ends of the belt clip into place.

CHANGING THE BATTERY

Make sure the telephone is **OFF** before you replace battery.

- 1. Remove the battery compartment door. 2. Disconnect the cord attached to the battery
- pack and remove the battery pack from the handset
- 3. Insert the new battery pack and connect the cord into the jack inside the handset.
- 4. Put the battery compartment door back on.
- 5. Place handset in the base to charge. Allow the handset battery to properly charge (for 12 hours) prior to first use or when you install a new battery pack. If you do not properly charge the phone, battery performance will be compromised.

CAUTION: To reduce the risk of fire or ersonal injury, use only the battery listed in the nstruction book.

BATTERY SAFETY PRECAUTIONS

- Do not burn, disassemble, mutilate, or puncture. Like other batteries of this type, toxic materials could be released which can cause injury
- To reduce the risk of fire or personal injury, use only the battery listed in the User's Guide
- Keep batteries out of the reach of children.
- · Remove batteries if storing over 30 days.

GENERAL PRODUCT CARE

To keep your telephone working and looking good, follow these guidelines

- Avoid putting the phone near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps).
- DO NOT expose to direct sunlight or moisture.
- Avoid dropping and other rough treatment to the phone. Clean with a soft cloth.
- Never use a strong cleaning agent or abrasive powder because this will damage the finish.
- Retain the original packaging in case you need to ship the phone at a later date.

CAUSES OF POOR RECEPTION

- Aluminum siding
- · Foil backing on insulation
- · Heating ducts and other metal construction can shield radio signals.
- You're too close to appliances such as microwaves. stoves, computers, etc
- Atmospheric conditions, such as strong storms.
- Base is installed in the basement or lower floor of the
- Base is plugged into an AC outlet with other electronic devices

TROUBLESHOOTING TIPS

CALLER ID

Problem	Solution
No Display	 Is battery fully charged? Try replacing the battery. Make sure the battery is properly installed and connected.
	 If you are using AC power, make sure that the unit is connected to a non-switched electrical outlet. Disconnect the unit from the plug and plug it in again.
	 Did you order Caller ID service from your local telephone company?
Caller ID Error Message	 The unit displays this message if it detects anything other than valid Caller ID information during the silent period after the first ring. This message indicates the presence of noise on the line.

Telephone

Problem	Solution		
No dial tone	 Check installation: Is the base power cord connected to a working outlet? Is the telephone line cord connected to the base unit and the wall jack? 		
	 Disconnect the base from the wall jack and connect another phone to the same jack. If there is no dial tone in the second phone, the problem might be your wiring or local service. 		
	 Is the handset out of range of the base? 		
	• Make sure the battery is properly charged (12 hours).		
	 Is the battery pack installed correctly? 		
	 Did the handset beep when you pressed the TALK button? Did the in use indicator come on? The battery may need to be charged. 		
Dial tone is OK, but can't dial out	 Make sure the tone/pulse setting is programmed correctly. 		
Handset does not ring	 Make sure the RINGER switch on the handset is turned to ON. You may have too many extension phones on your line. Try unplugging some phones. See solutions for "No dial tone." 		
You experience static, noise, or fading in and out	 Change channels Is handset out of range? Move closer to the base. Does the base need to be relocated? Charge battery. Make sure base is not plugged into an outlet with another household appliance. 		
Unit beeps	 Place handset in base for 20 seconds to reset the security code. If that doesn't work, charge battery for 12 hours. Clean charging contacts on handset and base with a soft cloth, or an eraser. See solutions for "No dial tone." Replace battery. 		

Memory Dialing

- Did you program the memory location keys correctly?
- Did you follow proper dialing sequence?
- Make sure the tone/pulse setting is programmed correctly
- Did you reprogram numbers into memory after power outage or battery replacement?

SERVICE

The FCC requires this product to be serviced only by the manufacturer or its authorized service agents. In accordance with FCC requirements, changes or modifications not expressly approved by ATLINKS USA, Inc. could void the user's authority to operate this product. For instructions on how to obtain service, refer to the warranty included in this user's guide or contact Consumer Information at 1-800-448-0329.

Or refer inquiries to ATLINKS USA. Inc. Manager, Consumer Relations P O Box 1976 Indianapolis, IN 46206

Attach your sales receipt to the booklet for future reference or jot down the date this product was purchased or received as a gift. This information will be valuable if service should be required during the warranty period.

Purchase date

Name of store

INTERFERENCE INFORMATION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna (that is, the antenna for radio or television that is "receiving" the interference).
- Reorient or relocate and increase the separation between the telecommunications equipment and receiving antenna
- Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected
- · Consult the dealer or an experienced radio/TV technician for help

If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal Communications Commission has prepared a helpful booklet, "How To Identify and Resolve Radio/TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402. Please specify stock number 004-000-00345-4 when ordering copies.

LIMITED WARRANTY

What your warranty covers:

Defects in materials or workmanship

- For how long after your purchase:
 One year, from date of purchase. (The warranty period for rental units begins with the first rental or 45 days) om date of shipment to the rental firm, whichever comes first. What we will do:
- Provide you with a new or, at our option, a refurbished unit. The exchange unit is under warranty for the remainder of the original product's warranty
- How you get service:
- Properly pack your unit. Include any cables, etc., which were originally provided with the product. We recommend using the original carton and packing materials. "Proof of purchase in the form of a bill of sale or receipted invoice which
- is evidence that the product is within the warranty period, must be presented to obtain warranty service." For rental firms, proof of first rental is also required. Also print your name and address and a description of
- the defect. Send via standard UPS or its equivalent to: ATLINKS USA, Inc. imadia Ind
- c/o Thomson multim 11721 B Alameda Ave
- Socorro, Texas 79927 Pay any charges billed to you by the Exchange Center for service not covered by the warranty Insure your shipment for loss or damage. Atlinks accepts no liability in
- A new or refurbished unit will be shipped to you freight prepaid.
- What your warranty does not cover:
 Customer instruction. (Your Owner's Manual provides information regarding operating instructions and user controls. Any additional
- information, should be obtained from your dealer.) Installation and setup service adjustments.
- Batteries.
- Damage from misuse or neglect.
 Products which have been modified or incorporated into other
- Products purchased or serviced outside the USA.
 Acts of nature, such as but not limited to lightning damage
